**Funding Source:** Section 106 Funding

**Completion:** October 2015

- Features:**
- Award Winning Design
  - Bespoke Design
  - Partnership work with Landscape Architect
  - Robinia Timber
  - FHS

## Project Background:

This is a unique scheme that was created in collaboration with the local school, Swan Paul Partnership and the designers of Jupiter Play. Barnardo's led the consultation with current and former pupils of Staplegrave Primary School who created the vision for the project.

## Next Steps:

The Jupiter Play product designer worked together with Louise Baugh, Landscape Architect from Swan Paul and FHS to create a huge pirate ship feature packed with play value and meeting every safety and quality standard. Jupiter Play often work closely with Landscape Architects to help realise a vision. In this case it was important to use sustainable materials and enhance the landscape with natural features as well as captivating children with a larger than life bespoke feature.

As with all projects, communication is king and the success of this bespoke play project is due to the ongoing consultation at every step of this project, from the product development to working closely with the contractor throughout the installation process.

## Outcome:

*"This is a wonderful new play area which truly reflects the wishes of local children.*

*This flagship play area shows just how much can be achieved when the community works together and the children of Staplegrave Primary School should be justifiably proud."*

**Cllr Catherine Herbert, Executive Councillor for Sports, Parks and Leisure, Taunton Deane Borough Council**

**Jupiter Play are also proud to have won the: Best Bespoke Outdoor Playground Equipment & Award for Innovation in Playground design in UK**

Innovation at our core
